[IMPORTANT NOTE: If the estate of the person who died includes real estate or other property that is collateral for a mortgage or loan, then the personal representative should consult an attorney about payment of allowances and other claims.]

EXAMPLE OF HOW <u>UNSECURED</u> CREDITOR PAYMENTS ARE CALCULATED: IN THIS EXAMPLE THERE IS \$200,000 AVAILABLE FOR DISTRIBUTION

		Amount remaining	
	Amount	after claim	
	of claim	is paid	
UNSECURED CREDITOR CLAIMS:			
 Allowance to surviving spouse 	55,000	145,000	(200,000-55,000=145,000)
 1st priority costs of administration 	12,500	132,500	(145,000-12,500=132,500)
Funeral expenses	5,250	127,250	(132,500-5,250=127,250)
Federal debts and past child support	27,895	99,355	(126,250-27,895=99,355)
Medical expenses of last illness	48,000	51,355	(99,355-48,000=51,355)
6. All other claims:			
C1, liability judgment	125,000		
C2, credit card A	2,500		
C3, credit card B	5,000		
C4, other medical expenses	15,000		
	147,500		

The total amount of "all other claims" is \$147,500. This is more than the \$51,355 that's left after paying priority claims 1 through 5. So "all other claims" (in row 6 above) will be paid only a percentage of their claim, which is calculated like this:

Other claims (from row 7)	Percentage of other claims	Amount to pay for other claims
C1, liability judgment C2, credit card A C3, credit card B C4, other med expenses	125,000 ÷ 147,500 = 84.7% 2,500 ÷ 147,500 = 1.7% 5,000 ÷ 147,500 = 3.4% 15,000 ÷ 147,500 = 10.2%	51,355 x .847 = \$43,498 51,355 x .017 = \$873 51,355 x .034 = \$1,746 51,355 x .102 = \$5,238 \$51,355
